

ALLISON^{lvc}

Earlier flowering and maturity for an early harvest.

Benefits

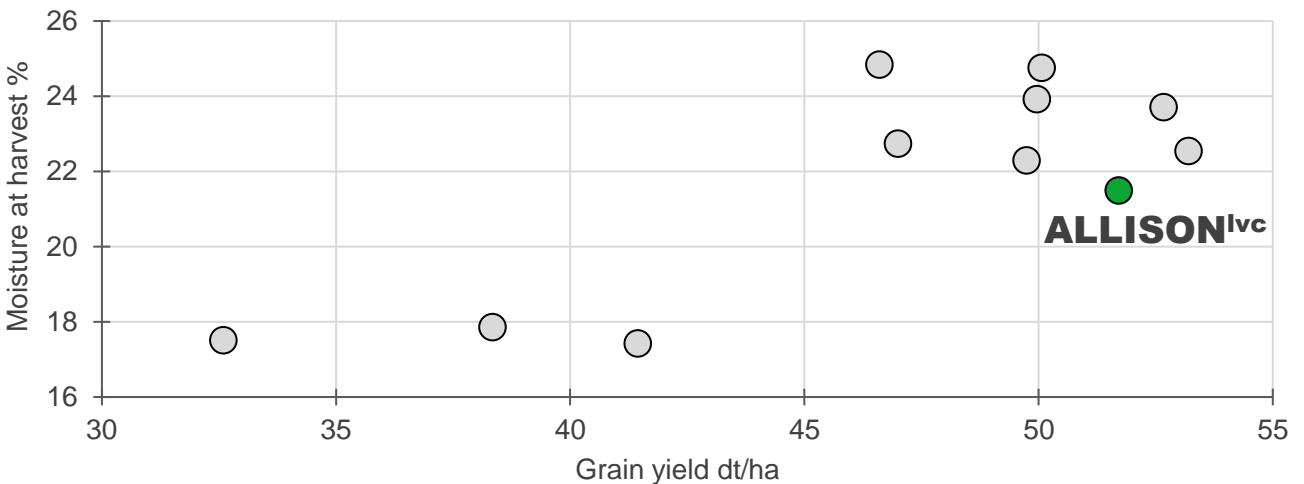

- ✓ Earlier flowering and ripening for timely yield formation and harvest.
- ✓ Powerful balance of yield, stability and plant health – confirmed low susceptibility to rust and Botrytis.
- ✓ Low vicine/convicine content, ideally suitable for animal feeding human consumption.

Classification based on German Federal Plant Variety Office 2023 and own observations.

Early maturity – suitable for northern latitudes.

ALLISON^{lvc} is a strong combination of earliness and yield and offers a wide range of utilisation possibilities with its reduced vicine and convicine content.
