

BOLIVIA^{lvc}

Healthy growth meets high protein content.

Benefits

- ✓ High yield potential & high protein content → above-average protein yield.
- ✓ Low vicine/convicine content ideally suited for animal feeding (especially poultry) but also interesting for human consumption.
- ✓ Low TGW.
- ✓ Early flowering and mid-early maturity, compact type.

6 Grain Yield

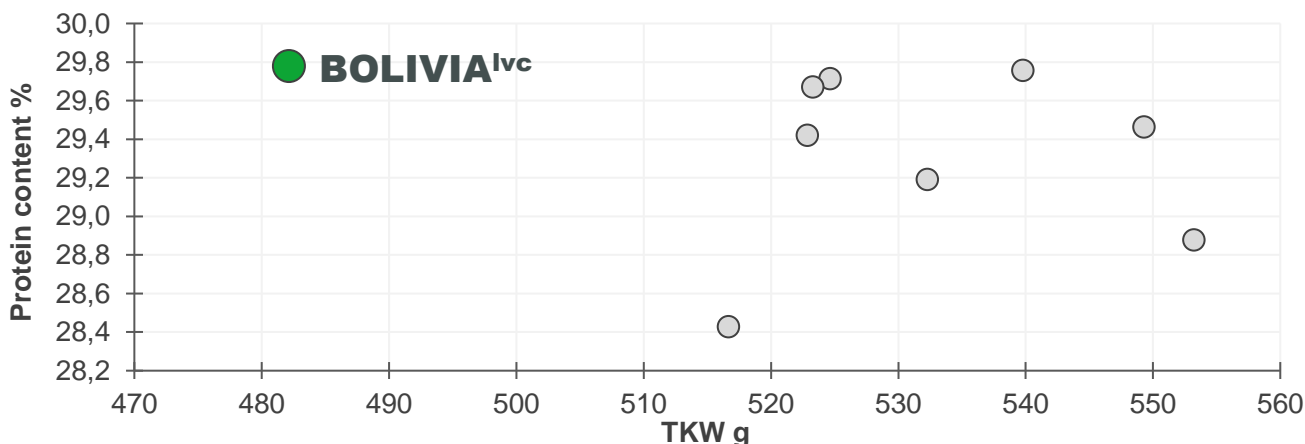

7 Protein Yield

8 Standability

Classification based on German Federal Plant Variety Office 2023 and own observations.

Low TGW with high protein content.

The small grain size of BOLIVIA^{lvc} reduces sowing costs and makes it easy to handle. In addition its high protein content makes BOLIVIA^{lvc} very suitable for human consumption and animal feeding.
