

# GENIUS

Concentrated knowledge for high profitability.

## Benefits

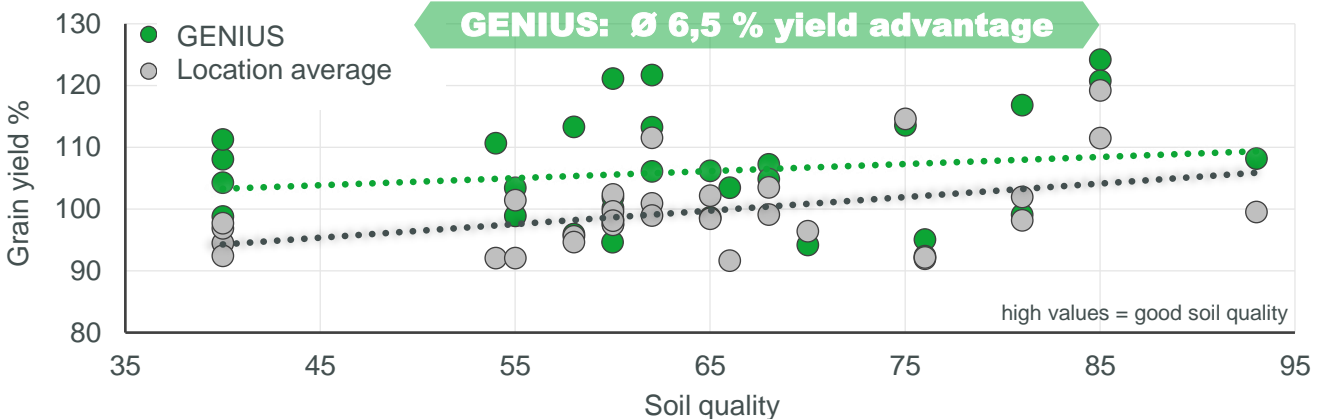

- ✓ Very high grain yield potential, with medium TGW.
- ✓ Low susceptibility to Botrytis.
- ✓ Longer plant type with improved stability and higher set pods.
- ✓ Certified-seed expected to be available for sowing 2025.

Classification based on German Federal Plant Variety Office 2023 and own observations.

## Modern agronomy meets maximum yields.

GENIUS convinces with an innovative combination of low to very low risk of lodging, low susceptibility to Botrytis and equal maturity of grain and straw and is completed by powerful grain and protein yields.
