

ORCHESTRA

Leading the way in protein content.

Benefits

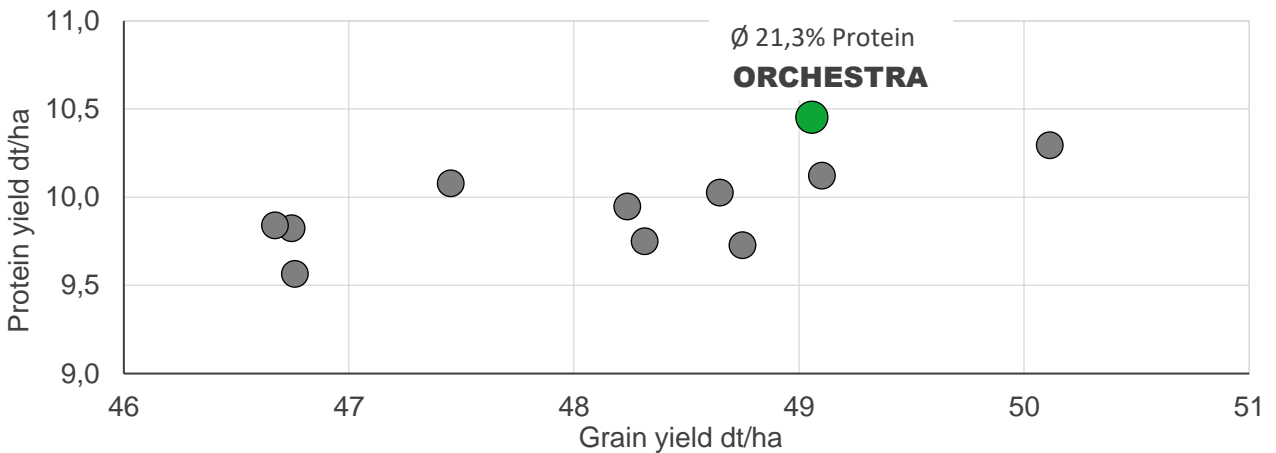

- ✓ Above-average protein content combined with very high grain yield.
- ✓ Efficient protein production for effective feeding and food processing.
- ✓ Excellent threshing properties for rapid and low-loss harvesting due to uniform ripening and good lodging resistance.

Classification based on German Federal Plant Variety Office 2023 and own observations.

ORCHESTRA - Breeding progress in protein content.

ORCHESTRA is characterized by a significantly increased protein content and a broad adaptability in Europe. The high protein content in particular makes ORCHESTRA interesting not only for the processing industry but also for livestock feeding.

Source: Germany, BSA. NL-trials 2021 & 2022
Only 2 years tested varieties presented. 25 locations grain and protein yield.
